

Although the team is small, there is a great sensibility for an international culture and tolerance for all ideas within the group. From the very beginning my integration into the GP Design machine was very smooth and through the guidance of the team I not only contributed to a large portion of the design projects but was encouraged to enhance my skills and develop my talents.

It has been a pleasure to work with such a warm and dynamic group of individuals who collectively are responsible for some great projects. GP designpartners is a great environment for a young designer to grow.
